A MNOUNCEMENT OF THE UNIVERSITY MEDICINES, THE THAUMATURGICAL REMEDIALS.

THE GREATEST SUCCESS OF THE AGE.

26,83 CURES IN EIGHT MONTHS.

THE PROOFS GIVEN.

The University Medicines are the favorite prescriptions of the New York Medical University, and are prepared in consonance with the views of a number of distinguished living American physicians, who believe that the time is come when educated physicians should arise and make a declave effort to overthrow the health-destroying system of Quackery prevailing in every town and city, and substitute selentific, responsible Remedials—made in accordance with the principles of Medica. Chemistry—in place of the worthless or dangerous Patent Medicines flooding the country.

These remedies are prepared by the newly discovered Chemical Process of Professor Scott, termed Stanu Fercolation, by which the entire active principle of any herb, drug or chemical is thoroughly extracted and its curative properties increased a hondred fold over those made in the ordinary manner. For particulars of this novel mode of manufacturing medicines see illustrated description in "Scott's Journal of Medicine," vol 1, No. 2. They are not patent medicines. We shall never patent one of them.

The imperial science of medicine tolerates no narrow, bligoted cancius/eness—the field is open to all. If any one class can make as fine apectors we certainly have no jealousy or objection. A knowledge of medicine and chemistry as profound as that of any physicians that have ever lived enables us to warrant these compounds to be the most perfect curatives for disease ever discovered in any age. Cost. Associated the control of the production of the designant health restoratives. They are combined with the most assiduous care from fine chemicals, with a true knowledge of their therapeutic powers and physiological excess. THE PROOFS GIVEN.

SPECIAL NOTICES.

clances—who has been commended by Professor Silliman, of Yale College, as one of the finest chemists in the world. By a process of great simplicity and originality we are enabled to secure all the valuable qualities of the various therapeutic agents in a pure, concentrated state, rendering them licespa-ble of adulteration or imitation, and imparting to them a effects, reliability and masterly power hitherto unknown in magiscine.

The following publications are free to all :—

1. The celebrated linestrated University Almanae for 1870, printed in colors, 109 pages, containing an elaborate description of the University medicines, the new system of medical practice (the Chemicopathic), our discoveries in medicine, testimonials, proofs, remarkable cures, important and novel physiological information, free to all who call or send. 2. History of the Cancer Plant. Contains illustrations of

remarkable ource.
3. The "New Remegit." A therapsuite funnygraph.
4. The Physiological Counsellor. A faithful adviser to men and women. This beautiful little book should be read by all before consulting the newspaper advertising quarks.

THE BLOOD IS THE LIFE.

New Discovery.

Compound Oxygen Treatment.

Dr. BROWN has located a permanent office at No. 15 West Twentieth street. New York, for the purpose of treating Ihroni, Lung and all diseases caused by an impure condition of the blood, by means of the inhalation of oxygen or a combination of essential gazes, which chemists sand selecution man have been trying to form for centuries, bidwithout tampible results, till the recent important discovery was made. Interest the recent important discovery was made. Interest the term of the proposition and effects from all other systems of treatment for diseases peculiar to the human family. It would be impossible in this limited space to enter fully into the philosophy and great advantages to be derived by this method of treatment, but suffice it to say that oxygen is the great renorator of the body and all sufficient in a healthy organism, provided fithe pure and ample in quantity. But as disease progresses and the blood becomes loaded with effects matter, inflammation, local or general, is laduced, and the whole structure is in danger. To renovate the blood, the sources of beatity accretions, is airrely new way to roppir the misoblet; and as pure air is sufficient only for healthy conditions. In disease, then, the demand for a greater supply must be met by a la ger supply of the life, giving agent.

The blood furnishes the elements of bone, the ame blood if expression and the security of muscles; to nerves, the elements of muscles ito nerves, the elements of muscles ito nerves, the clement of nearest the elements of blood, by which they are funished, are the seame. Hence the importance of a medical agent that will reach all diseased and impovershed condition. Because of these differ somewhal in composition, decomposing all impurities in the blood; to, which they are funished, are the same. Hence the importance of a medical agent that will reach all diseased to he hand. Breathed into the lungs it enters the circularities, and is now being used as a vane

TO INVALIDS GOING ABROAD.—AN EXPERIENCED
I New York physician, having an extensive acquaintance abroad, contemplates travelling through France and Germany in June, Juny and August, and would, for a reasonable consideration, take professional charge of one or more invalids who may dealer to seek physical bauest from the mineral springs of Germany and foreign travel. Reference given. Address Dr. P., Herald office.

WHEREAS, WITH THE DECLINE OF GOLD AND

the cost of house building in order to bring capital into market for invertment in real estate and building at reasonable rates.

We, the master builders and others, representing the different branches of house buildin, believe that the terms the master store cutters have offered to their employs for the season commencing March 10, 1870, a full and fair commensation for their services, and as much, if not more, than the present demand for such labor would warrant. We con liter the atrike of the Store Cutters' Union an injudicious one and uncalled for at the present time; that the consequences of this strike will be most faild to themselves, above all others, by partly postponing the consummation of new contracts for the essays, or compelling architects and owners to substitute other materials in place of stone. We therefore Recolve, That we sympathize with and will aid the master stope cutters in their just efforts to make stone cutting a marketable commodity, and that wherever it lies within our means we will interce be for them with owners and contractors, and secure them against loss for non-infliment of contracts on hand, until their employes will have the good sease to resume work and abandon a strike most fatal to themselves and the house building trade generally.

We would further recommend the master stone cutters to give employment and keep in their employ for the future such men of the Union or others who are ready to go to work at once, and protect them by their own presence from initial-dations by the strikers, and, if necessary, call upon the proper authorities to protect themselves and their workmen in their rights as citizens to care a living in the pursant of their legitimate business.

JOHN T. CONOVER, Chairman.

H. VOLK, Scoretary.
